FOREWORD

CA 2 ON
IT 100
- 052

This publication provides an overview of Ontario's foreign trade in 1983.

All tables, unless specified otherwise, have been compiled from data provided by Statistics Canada. The statistical section is preceded by a summary of international developments and highlights of Canadian and Ontario trade performance during the year.

The terms "Ontario exports" and "Ontario imports" used throughout the booklet correspond to the following Statistics Canada definitions:

Ontario Exports—Canadian exports (including re-exports) reported with Ontario as the province of lading.

Ontario Imports—Canadian imports reported with Ontario as the province of clearance.

Requests for copies of this publication and any related comments or questions should be directed to:

TRADE DEVELOPMENTS

I. THE WORLD

Economic conditions in Ontario's major export markets took a turn for the better in 1983. Paced by the strong U.S. economic recovery, real output expanded by 2.3 per cent in the industrialized countries, as noted in Chart I, resulting in increased demand for a wide range of products and services. Improved performance in most nations signalled the end of the most severe contraction in the global economy in half a century.

Despite the upturn in industrial activity, foreign markets for most of Ontario's key exports remained intensely

competitive. Uncertainty also remained high. At year end, major questions continued to surround both the strength and durability of the recovery.

The United States economy rebounded sharply in 1983. Real GNP expanded by 3.4 per cent. Lower interest rates, stronger consumer and business purchases and higher defence outlays helped sustain the economic expansion, allowing the United States to outperform most of its key trading partners during the year.

At the regional level, increased capital spending by American companies, buoyant housing starts and a rise in auto sales spurred industrial production in the Great Lakes states, an important market for Ontario's exports. Output also expanded briskly in the Southeast and Pacific areas. Soft energy and minerals markets dampened economic growth in the Mountain states and Southwest, causing the performance of these regions to lag behind the rest of the nation.

The American trade deficit, which ballooned from \$43 billion to \$69 billion as a result of the dollar's overvaluation, emerged as a major source of concern in 1983.

Economic growth in Western Europe generally lagged behind North America during the year. The United Kingdom, which experienced a 3.1 per cent rise in real output, and the Scandinavian countries performed better than most of the other Western European economies.

Benefitting from positive developments abroad and the competitive value of the

yen, the Japanese economy gained momentum in 1983, expanding by 3 per cent in real terms. The industrializing nations of Southeast Asia also lived up to their reputation for dynamism, with rates of growth exceeding 7 per cent in a number of countries during the year.

Aided by China's ambitious drive to modernize its economy, the volume of trade and commercial activity focussed on the region continued to expand rapidly.

Lower petroleum prices dampened economic growth in the Middle East in 1983. Conditions were also restrained in Latin America. Despite this fact, some Latin American nations such as Mexico did make substantive progress on the economic front during the course of the year.

On a positive note, world inflation subsided substantially in 1983. The continued weakness of international energy and commodity markets worked in step with domestic restraint programs in many countries to dampen cost pressures. Consumer prices rose at an annual rate of slightly over 5 per cent in the OECD nations, a sharp drop from the double digit inflation rates experienced throughout much of the industrialized world in the early 1980's.

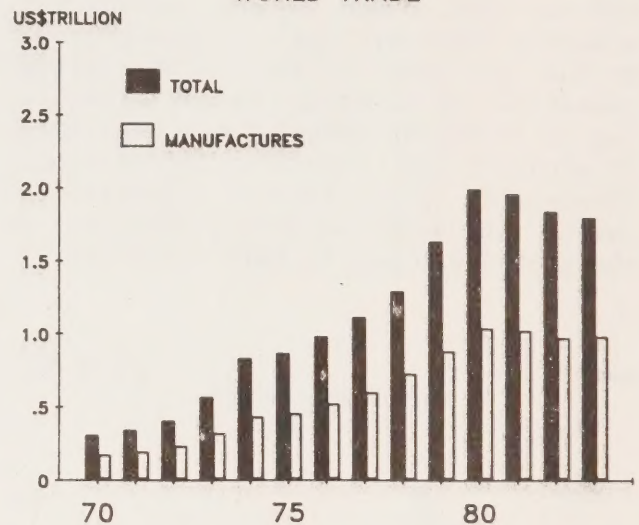

Efforts to reduce unemployment which remained at near-record levels in many nations met with more limited success. The large number of individuals seeking work served to keep the jobless issue high on the political agenda in most countries. Employment considerations continued to impact heavily on the commercial policies adopted by Ontario's trading partners.

The physical volume of world trade rose by 2 1/2 per cent in 1983, although the dollar value declined slightly due to weak prices for oil, metals, and other major resource commodities. The value of world trade in 1983 amounted to slightly over US\$1.8 trillion. As noted in Chart II, this represents a drop from approximately US\$2.0 trillion prior to the recession.

CHART II

WORLD TRADE

SOURCE: U.N.

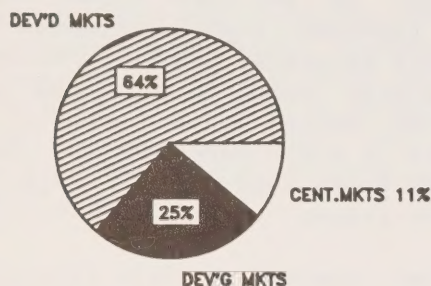

With foreign purchases totalling US\$1.2 trillion in value, the developed market economies consumed almost two thirds of world imports in 1983. The purchases from abroad of the developing nations amounted to US\$451 million, while the centrally planned economies accounted for a further 10 per cent of world-wide expenditure on imported goods. Chart III illustrates the distribution of imports on a global basis.

CHART III

SOURCE: U.N.

WORLD IMPORTS, 1983

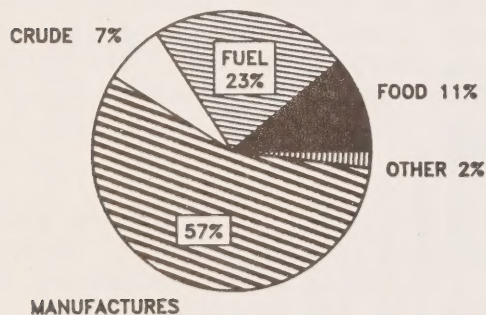

Trade in manufactured goods, which accounted for just over half of the value of international commerce, amounted to approximately \$1 billion in 1983. As Chart IV indicates, energy products represented about a quarter of the value of world trade during the year. The balance was largely comprised of other industrial materials and food products.

CHART IV

SOURCE: U.N.

WORLD TRADE, 1982

Exports and imports of manufactured goods, which rose by 5 per cent in volume from the previous year, showed considerably greater strength than other components of global commerce.

Two key issues in 1983 were protectionism and the world debt situation.

Canadian exporters continued to benefit from the reduced rates of duty resulting from the Tokyo Round. Nevertheless, the year brought new evidence of the growing threat posed by non-tariff barriers to the ability of many companies to market their products freely on a global basis.

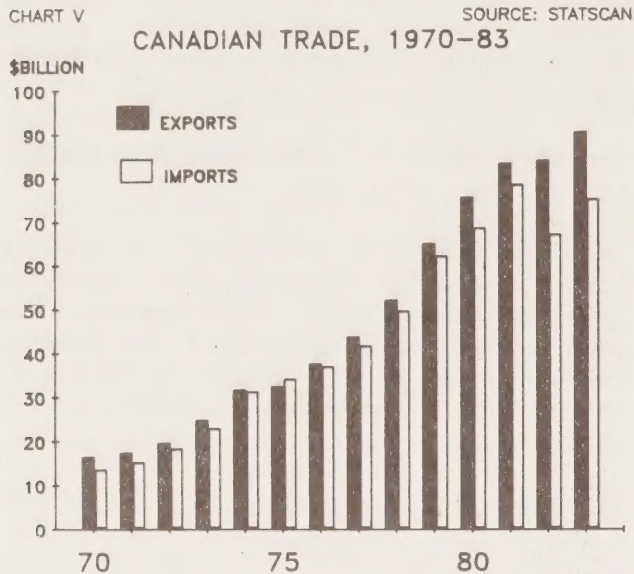

The heavy debt repayment obligations of a number of developing and some industrialized countries continued to strain the international financial and trading system.

II. CANADA

Canada's exports benefitted from the improved global economy in 1983, even though the high value of the dollar hampered sales to markets outside North America.

Exports of Canadian products totalled \$91 billion during the year, a 7.8 per cent rise from 1982. In 1970, Canadian exports amounted to \$16.9 billion. Chart V illustrates the substantial rise

in the value of Canada's two-way trade with other countries over this period of time.

The growth of Canada's exports compared favourably with the world's other major trading countries in 1983. As a result of the strong rise in our export sales, Canada's share of world trade increased to 4.1 per cent from 3.7 per cent a year earlier.

The strong upturn in the United States significantly boosted Canada's economic performance in 1983. Aided by increased construction activity, a rise in spending by industry and the stimulative impact of lower financing and gasoline costs on consumer purchases, Canadian exports to the American market leaped to \$66.3 billion, 16 per cent higher than the year before. The United States consumed 73 per cent of Canada's exports, a rise from 68 per cent in 1982.

The automotive industry continued to account for the largest single component of Canada's trade with the United States. American-bound shipments of vehicles and parts amounted to \$21.1 billion, 32 per cent higher than in 1982. Expanded export shipments by the industry permitted Canada to reverse its traditional automotive trade deficit with the United States for the second year in a row. Nevertheless, the balance in parts continued to weigh heavily against Canada.

Canadian exports to Asia increased in value from year-earlier levels, while exports to the Middle East and Latin America were weaker than in 1982. Sales of Canadian products to Western Europe, which dropped 11 per cent from the preceding year, also declined in value.

Exports from Canada of forest products, non-ferrous metals, and chemicals rose during the year from 1982. Shipments abroad of iron and steel products and industrial machinery declined in value from earlier levels.

Spending on imported goods mirrored the upwards trend in export sales. After falling sharply in 1982, the value of Canadian imports increased to \$75.6 billion, a 12 per cent rise from a year earlier.

The United States retained its position as Canada's leading source of imports in 1983, supplying goods valued at \$54.1 billion to the Canadian market. The United States accounted for 72 per cent of Canadian imports during the twelve-month period.

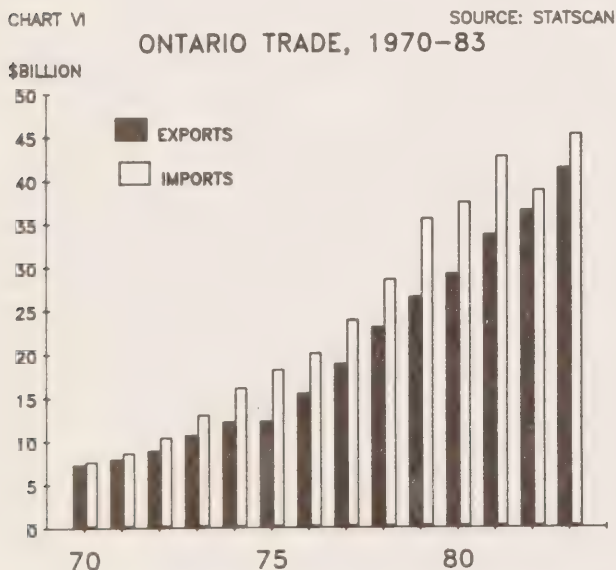

Canada's merchandise trade balance deteriorated in 1983. Sales abroad exceeded imports by \$15.4 billion, compared with a year-earlier surplus of \$16.8 billion.

Contrasting with the positive overall balance, imports of fully manufactured goods continued to outstrip exports. Canada's deficit in trade in fully manufactured goods amounted to \$12.9 billion, up from \$10.3 million in the preceding year.

III. ONTARIO

A) OVERVIEW

Ontario's exports rose by 13.2 per cent to \$41.7 billion in 1983, as indicated by Chart VI. Ontario accounted for 46 per cent of Canada's sales to other countries, up from 44 per cent the year before.

Imports increased in value to \$45.6 billion from \$39.1 billion in 1982. Ontario accounted for 60 per cent of Canadian imports during the year. Higher expenditures on imported products, particularly consumer items, resulted in a worsening of Ontario's trade deficit which widened to \$3.9 billion after declining in the previous year. The deficit in fully manufactured products trade also increased.

CHART VII

SOURCE: I.M.F.

EXPORTS PER CAPITA, 1983

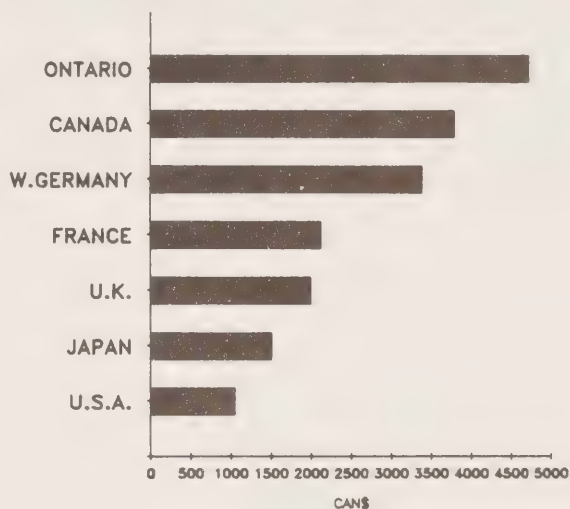

Chart VII compares Ontario's dependence on international trade with a number of leading industrial countries. In 1983, Ontario exported three times as much as Japan did in per capita terms and four times what the United States sold to other nations. Measured in relation to its population base, Ontario's imports were also substantially higher than either of these two countries.

B.) EXPORTS

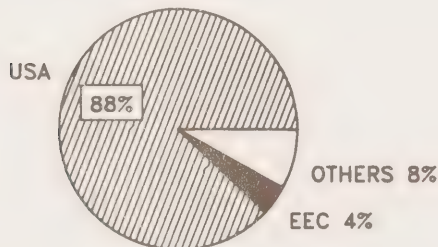

Since 1970, Ontario's exports have increased more than five-fold in value. This upwards trend continued in 1983. Expanded sales abroad of transportation and telecommunications equipment, steel, forest products and consumer goods such as furniture provided a strong stimulus to Ontario's industrial base during the year.

The share of Ontario's exports destined for the United States rose substantially in 1983, mirroring the strong American economic recovery and low value of the Canadian dollar relative to its American counterpart. As noted in Chart VIII, the United States accounted for 88 per cent of Ontario's sales abroad, an increase from 82 per cent in 1982. Ontario's trade continued to exhibit a greater orientation to the American market than the exports of Canada as a whole.

CHART VIII

SOURCE: STATSCAN

DESTINATION OF ONTARIO EXPORTS 1983

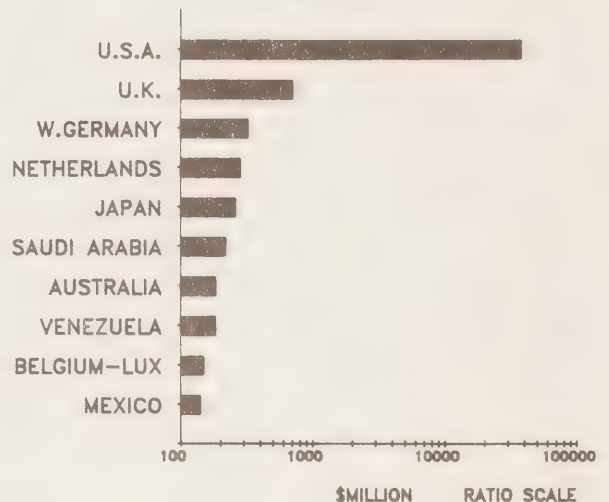

Other leading destinations for provincial exports during the year, in descending order of importance, were the United Kingdom, West Germany, the Netherlands, Japan, Saudi Arabia and Australia. Chart IX compares the value of Ontario's exports to these nations and a number of other key markets in 1983.

CHART IX

SOURCE: STATSCAN

LEADING ONTARIO EXPORT MARKETS, 1983

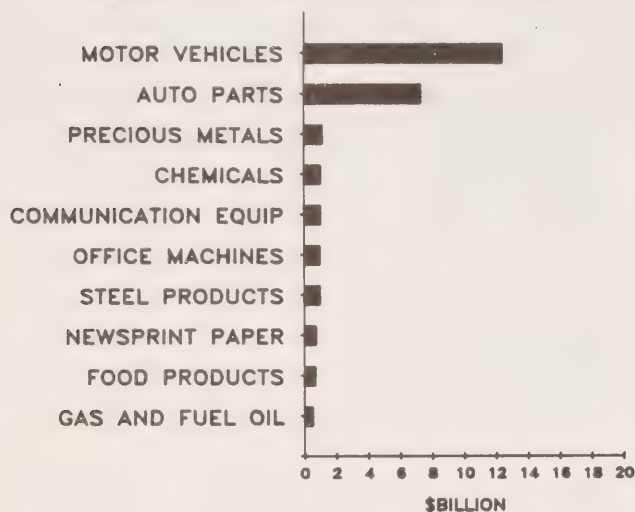

Assembled vehicles and automotive parts formed the largest component of Ontario's exports in 1983. Shipments abroad of parts and vehicles were valued at slightly under \$20 billion. The automotive industry accounted for almost half of the value of Ontario's sales to other countries during the year. As noted in Chart X, precious metals, chemicals, communications equipment, office machinery, steel and newsprint headed a wide and growing range of other products

supplied by Ontario industry to customers around the globe.

CHART X

SOURCE: STATSCAN

MAJOR ONTARIO EXPORTS, 1983

The following sections provide an overview of Ontario's export trade with the major regions of the world in 1983:

United States

Exports from Ontario to the United States climbed steeply to \$36.9 billion in 1983, 22 per cent higher than the year before. Sales of Ontario's ten leading exports all gained in value from the preceding year.

Spurred by lower financing costs and stable gas prices, exports of assembled passenger automobiles and trucks climbed by 20 per cent to \$12.2 billion. Exports to the United States of automotive parts and engines also increased sharply, rising to \$7.0 billion.

Increased sales of office machinery which rose by 25 per cent, precious metals, forestry and refined petroleum products added to the year-over-year rise in exports. Responding to the upturn in construction activity, the value of sales of furniture and fixtures from Ontario to the United States increased by 34 per cent to \$267 million.

Exports to the United States of aircraft and parts, electricity, telecommunications equipment, steel products and distilled alcoholic beverages also grew from the preceding year. On the other side of the coin, shipments of agricultural equipment, nickel and alloys, metalworking equipment, and machinery for the petroleum and mining industries fell in value.

Western Europe

Ontario's second largest market, the countries of Western Europe, accounted for 4.7 per cent of provincial exports in 1983. Sales amounted to \$2.0 billion, down 13 per cent from a year earlier. The value of the dollar and relatively slow recovery in comparison with North America hindered the expansion of Ontario's sales to the region. Ranked in order of importance, Ontario's top markets in Western Europe during the year were the U.K., West Germany, the Netherlands, Belgium and France.

Ontario exported \$188 million of nickel to Western Europe in 1983, more than any other single product. Listed in order of importance, telecommunications equipment, office machinery, photographic equipment and motor vehicle parts

were the top-ranked manufactured items exported to the region.

Exports of telecommunications equipment to Western Europe declined marginally to \$95 million in 1983. Auto parts exports also fell in value from the preceding year. Lower sales of these products were offset by higher exports of office machinery, which rose from \$70 million to \$82 million. Exports of photographic equipment also increased in value.

Tobacco was Ontario's top-ranked agricultural export to Western Europe in 1983. Provincial exports of tobacco to the region were valued at \$48 million, a decline of \$20 million from a year earlier.

South & Central America

Ontario's exports to the countries of South and Central America, including the Caribbean, totalled \$980 million in 1983. The area was the third largest market for provincial exports. Shipments to the region represented 2.3 per cent of Ontario's sales abroad.

With imports valued at \$180 million, Venezuela was Ontario's leading market in South and Central America. Mexico, Columbia and Trinidad-Tobago were next in rank based on the value of their imports from Ontario.

Automotive parts and engines, shipments of which topped \$300 million in value, were the single most important product exported by Ontario to South and Central America in 1983. Commercial and industrial telecommunications equipment, steel, plastics products, and office

machinery also contributed heavily to the value of Ontario's export trade with the region.

Asia

Exports to Asia amounted to \$814 million in 1983. Ontario's leading markets were Japan, Hong Kong, the People's Republic of China and South Korea. Exports to these four countries amounted to over half a billion dollars in value and accounted for 64 per cent of Ontario's sales to the region.

Within Asia, the Asean countries represent a growing market for a wide range of goods from Ontario. Exports to the member countries of the Association amounted to \$203 million in 1983.

Meat products, plastics materials, telecommunications equipment, and office machinery were among Ontario's most important exports to Asia in 1983.

Although provincial exports to Asia have expanded substantially from \$287 million a decade ago, Ontario still purchases more than it sells to the region. In 1983, the province's deficit in two-way trade with Asia amounted to almost \$2 billion.

Middle East

The Middle Eastern nations imported goods valued at \$546 million from Ontario in 1983. Ontario's largest customer was Saudi Arabia, with purchases valued at \$215 million. Egypt, Turkey, Kuwait and Israel were the other top-ranked markets in the region for Ontario products.

Shipments from Ontario to the Middle East declined by 40 per cent in 1983, despite a rise in exports to Turkey. The weakness of the petroleum sector and intense competition from other suppliers helped to constrain demand for Ontario goods during the year.

Heading the list of products exported from Ontario to the Middle East were automobiles and parts, shipments of which were valued at \$190 million. Other key exports included telecommunications equipment valued at \$65 million and \$17 million of aircraft and parts.

Sales to the Middle East of unmanufactured tobacco more than tripled in 1983 to \$15 million. Exports of power boilers also rose in value.

Oceania

Australia retained its position as Ontario's leading market in Oceania, with purchases totalling \$233 million in 1983. Exports to the second most important customer for Ontario products in the area, New Zealand, amounted to \$48 million over the same period.

Ontario exported motor vehicle parts and accessories totalling \$39 million and telecommunications equipment valued at \$18 million to Oceania in 1983. Other leading exports included \$17 million of office machinery and \$14 million worth of plastics materials.

Africa

Ontario's export sales to Africa were valued at \$164 million in 1983, a drop of 43 per cent from a year earlier. The

leading markets for exports from Ontario were Algeria, Nigeria, Morocco, and South Africa.

Ontario's top-ranked exports to Africa in 1983 were equipment for the food, beverage and tobacco industries, and conveyers and conveying systems. Sales of each of these two types of products were valued at approximately \$15 million. Other leading exports to the area included motor vehicles and parts, mining and oil and gas machinery, and construction equipment.

Eastern Europe

Eastern Europe imported \$64 million of goods from Ontario in 1983. The largest customer was the U.S.S.R. which accounted for \$26 million of this amount, 41 per cent of Ontario's sales to the region. The next two largest markets for Ontario goods were Yugoslavia and East Germany.

The leading products exported by Ontario to Eastern Europe in 1983 were man-made fibres, electronic components, chemicals, and telecommunications equipment.

C.) IMPORTS

Ontario's imports amounted to \$45.6 billion in 1983, an increase of 17 per cent from the preceding year. The improvement in the domestic economy, which helped to stimulate spending on foreign-produced goods, was one of the factors underlying this sharp rise. Ontario's imports grew more rapidly than

Canadian imports which increased by 12 per cent.

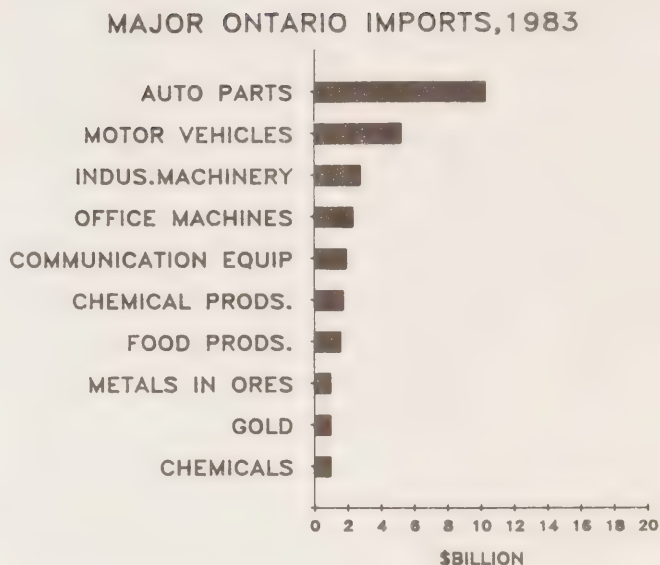

The United States was Ontario's leading supplier of goods from abroad in 1983. Imports from the United States amounted to \$38.3 billion, up from \$33.2 billion in 1982. Ontario also retained its position as the largest foreign customer for American-produced products, ranking well ahead of Japan in importance.

Imports from Japan, Ontario's next largest international supplier in 1983, totalled \$1.3 billion. Almost \$1 billion of goods were imported from the United Kingdom, the third most important source of products brought into Ontario from abroad. Ontario also constituted a key market for goods originating in West Germany, Taiwan, Hong Kong, and Italy.

As noted in Chart XI, Ontario's leading imports were automotive products, industrial machinery, office and communications equipment. These products accounted for more than half of Ontario's purchases from abroad.

CHART XI

SOURCE: STATSCAN

Manufactured products made up about 70 per cent of the value of provincial imports in 1983. Purchases of these goods from sources outside Canada contributed heavily to Ontario's international trade deficit.
